Graphs of Indemnity and Medical Loss Ratios

This exhibit consists of six graphs. Pages 10.1 and 10.2 show graphs of indemnity and medical loss ratios using the paid to twenty-fourth, incurred and the average of the incurred and the paid to twenty-fourth methods. Pages 10.3 and 10.4 are analogous to pages 10.1 and 10.2 but show severity ratios for indemnity and medical respectively. These graphs provide a comparison of projected ratios for a range of methods.

Staff has also included pages 10.5 and 10.6, which show the trended loss ratios as well as their frequency and severity components. Please note that the frequency, severity and loss ratios are all expressed on a normalized basis with policy year 2000 set equal to unity.
